1. Remove the protecting plug from the rear part of the armrest profile.
2. Make sure the screws in the table mount are loosely screwed and then slide the nuts into the slot.
3. Slide the mount to the desired position and tighten the screws.
4. Replace the protecting plug.
5. Mount the table by inserting the peg in the mount. Use the knob to lock it or to set the desired feeling for the rotation.
6. Finished!

### Use and Care instructions

The mug tray can be cleaned by wiping with soap and water. For further information see Maintenance Instructions, art. no. 95730-1.

- Hot beverages should not be used in the mug holder due to the risk for spill that could burn the user.
- Make sure not to tilt the seat a lot when having a mug in the holder. This since the table will follow the tilt movement and might cause spill.
