

HD Motion is equipped with tip protectors, see picture A. The same tip protectors are used as standard for HD Motion 22 with 22" drive wheels and for HD Motion 16 with 16" drive wheels.

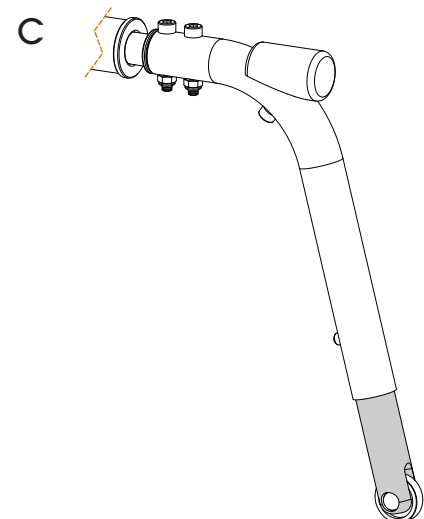

20" drive wheels

When HD Motion 22 is configured with 20" drive wheels the standard tip protectors are replaced with a variant that has a shorter tube, see picture B.

24" drive wheels

When HD Motion 22 is configured with 24" drive wheels the standard tip protectors are replaced with a variant that has a longer wheel attachment, see picture C.

Replacement of tip protectors

Replacing tip protectors is to be done by trained personnel. See *Technical Information*, document number 96720-1, for instructions.
