

# respine®

Respine is a portable back and neck support developed by HD Rehab in consultation with physiotherapists and people with neck disorders.

## Support for both Neck and Back

Respine supports the neck when using it on chairs with a low back. The neck support is adjustable in height and depth. Respine also has an adjustable built-in air cushion to support the low back and to help create an ergonomic sitting position.

## Light and Flexible

The weight of Respine is only 850 grams which makes it very easy to bring along for using in different environments.

Weight: 850 g  
Dimensions, folded: 8 x 28 x 51 cm  
Fits stature: approx. 150-195 cm\*  
Continuously adjustable intervals:  
Lumbar support height: 10 cm  
Lumbar support depth: 3 cm  
Neck support height: 25 cm  
Neck support depth: 9 cm

\*Varies depending on body proportions. Therefore Respine should be tested before buying, if stature is close to the limit points.

CE Respine is a CE-marked medical device.

 Made in Sweden
